

Google Fonts & CSS

Link: www.google.com/fonts

Full instructions found in Missing Manual Using Fancy Fonts p 448

1. Go to www.google.com/fonts
2. Select font
3. Click on Quick Use
4. Click on @import
5. Copy link and put in CSS after the @import in the child theme or just after template details in in master theme
6. Add the font CSS to the headings eg #site-title

EG: @import url(http://fonts.googleapis.com/css?family=Kite+One);

CSS: font-family: 'Kite One', sans-serif;

All CSS example

```
#site-title {  
    font-size: 40px;  
    font-size: 4rem;  
    font-family 'Kite One', sans-serif, 'Times New  
Roman', arial;  
}
```
